Physical distancing helps stop the spread of infectious diseases. It means less close contact between you and other people.

COVID-19 is primarily spread through respiratory droplets produced when an infected person coughs or sneezes.

- Avoid unnecessary close contact with others
- Keep a distance of at least 1.5 metres between people
- Wave instead of handshake or hugging as a greeting
- Don’t share objects

We appreciate the UQ community working together cooperatively during this uncertain time!
Thank you for helping keep everyone at UQ safe.
